- Soft carrying pouch

## INTENDED USE

This device is intended to measure alcohol in human breath. Measurements obtained by this device are used in the diagnosis of alcohol intoxication. Estimates and results may vary. This product cannot determine the subject's exact blood alcohol concentration (BAC) and should not be used for such purposes. Read the enclosed instructions first to ensure proper use, accuracy limitations and calibration requirements. It is very important to have the instrument calibrated as recommended in the instructions. Failure to do so may result in inaccurate readings. Do not rely upon results to determine level of intoxication or your ability to safely operate motor vehicles or heavy machinery.
